REASONS for ALLOWANCE

The following is an Examiner's statement of reasons for the indication of allowable subject matter: renumbered claims 1-7 are allowable over the prior art of record an update of a search does not detect the combined claimed elements as set forth in the claims 1-7. Claims are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests an apparatus or a system comprises a processor having a resource scheduler, an instruction queue, one or more schedulers, a replay controller/checker to check contents of a data cache and to replay requests if data is not located in the data cache, and a reorder buffer to store the request that is replay safe and a memory controller having an early data ready mechanism to detect readiness of the one or more bus clocks prior to the data being ready to be transmitted to the processor and to transmit an early data ready indication to the processor to drain the request from the resource scheduler as described in the specification and together with combination of other claimed element as set forth in the claims.

Therefore, claims 1-7 are allowable over the prior art of records.
